PROFESSIONAL SUMMARY

Detail-oriented Quality Assurance Engineer with over 4 years of experience in manual and automated testing of web and mobile applications. Proven track record in designing robust test cases, optimizing regression testing suites, and collaborating closely with cross-functional development teams. Strong foundation in Python, SQL, and data analysis, with hands-on experience applying data-driven approaches — exploratory data analysis, test metrics dashboards, and basic predictive modeling — to improve QA decision-making, alongside growing exposure to cloud-based deployment environments.

WORK EXPERIENCE

Senior Quality Assurance Engineer

November 2023 – Present

NexusTech Solutions Inc., Makati City, Philippines

- Lead a team of 3 QA testers in executing comprehensive functional, integration, and regression testing for an enterprise e-commerce platform.
- Designed and maintained an automated testing framework using Selenium WebDriver and Python, reducing manual regression testing time by 40%.
- Built Python/Pandas scripts to analyze historical defect and test-execution data, identifying failure-prone modules and prioritizing regression coverage accordingly.
- Formulated complex SQL queries to validate data integrity, backend business logic, and database migrations across PostgreSQL environments.
- Created recurring QA metrics dashboards (defect trends, test coverage, flaky-test rates) using Python and Matplotlib/Seaborn to support sprint retrospectives and release-readiness decisions.
- Collaborated with DevOps teams to integrate automated test scripts into Jenkins CI/CD pipelines, gaining practical exposure to AWS EC2 and S3 infrastructure.
- Championed the transition from ad-hoc manual testing to a structured Agile/Scrum sprint testing cycle, improving delivery predictability.

QA Automation Engineer

July 2021 – October 2023

Vanguard Software Philippines, Pasig City, Philippines

- Developed and executed automated test scripts for financial technology web applications using Java and TestNG.
- Analyzed business requirement documents (BRDs) and technical specifications to create detailed test plans and over 500+ individual test cases.
- Logged, tracked, and verified software defects using Jira, collaborating directly with software developers to ensure timely resolution of blockers.
- Performed basic API testing using Postman to verify payload responses, status codes, and endpoint performance.
- Managed and queried test data sets using MySQL and Pandas, performing data extraction, cleaning, and validation to support sprint activities and early exploratory analysis of test-result trends.

TECHNICAL SKILLS

- Testing Automation & Tools: Selenium WebDriver, TestNG, Postman, Jira, Jenkins, Git
- Programming & Scripting: Python, Java, JavaScript, HTML5, CSS3
- Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), basic scikit-learn (classification/regression fundamentals), Jupyter Notebook
- Databases & Analytics: SQL (PostgreSQL, MySQL), Data Manipulation & Querying
- Cloud & Infrastructure: Basic AWS Exposure (EC2, S3), Linux CLI, Docker Fundamentals
- Methodologies: Agile/Scrum, SDLC, STLC, Regression Testing, Exploratory Testing

CERTIFICATIONS

- ISTQB Certified Tester – Foundation Level (CTFL) – Issued 2022
- AWS Certified Cloud Practitioner – Issued 2025

EDUCATION

Bachelor of Science in Information Technology
Metro Manila Technological Institute | Graduation Year: 2021
